RibLÖCK

WHAT IS RIB-LOCK®?

PATENTED LOCKING MECHANISM

Reduces mat movement drastically

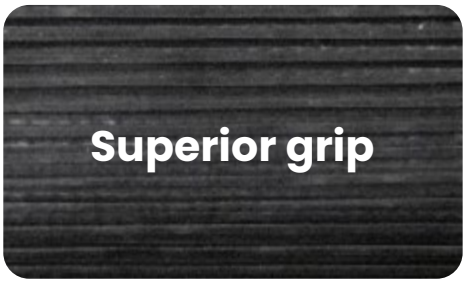

Install it yourself

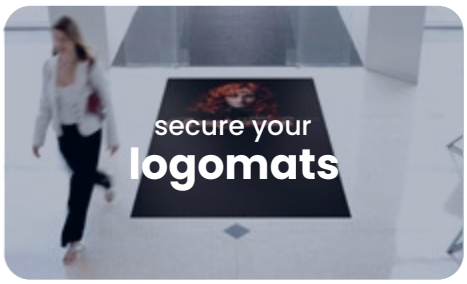

Ensuring stability and safety

More durable than velcro

Velcro loses effectiveness after 50 washes.

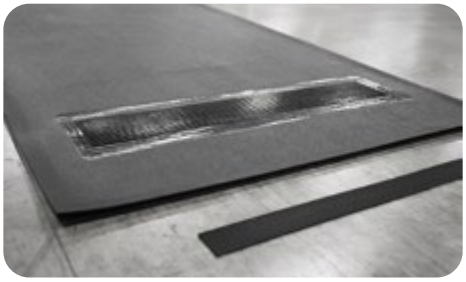

Non-damaging

to the mat or floor surface

Functional & aesthetic

you won't see it.

Lightweight

doesn't increase the mat weight

Mat stabilized with RibLÖCK

HOW DOES IT WORK?

RIB-LOCK® is built into the mat and is combined to a negative pattern made from anchor strips on the ground for enhanced grip.

HOW TO INSTALL?

Mat placement

- Embossed list section on the end where most traffic enter onto the mat

Anchor strip placement

- +/- 25 cm from the mat border
- Parallel to the mat and Perpendicular to the main entrance point / direction of traffic flow

FIRST TIME INSTALLATION

Adhere the anchor strip

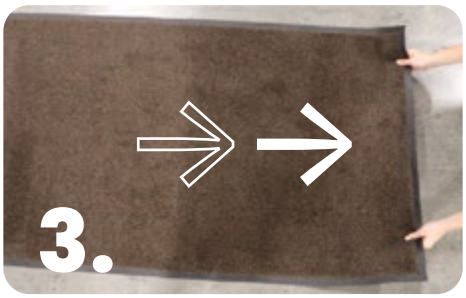

Long-lasting self-adhesive anchor strip

- Check that the anchor strip fits into the ribs in the backing.
- Remove the protective plastic from the double sided tape.
- Adhere the self-adhesive anchor list once to the floor.
- Step on it to ensure it's securely fastened.

DAILY USE

Lock the mat

- Place the mat on the floor and pull it to you.
- Stop when you feel resistance. This means the ribs are placed well.
- Step on it to lock the mat to the anchor strip.

Available for Colorstar logomats. Not available for UK products.
